

Introducing the TRX50 SMS Text Messaging Alert System

Stay connected, stay secure, stay ahead.

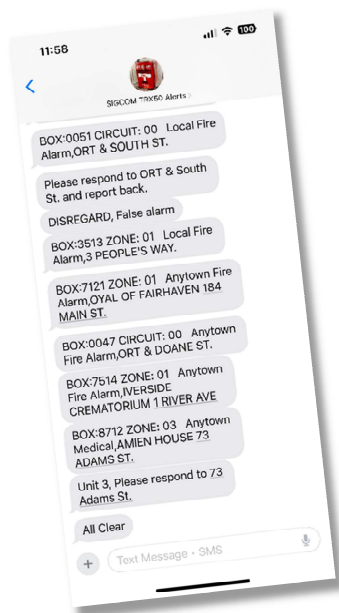

Every second counts in Emergency Management. Sigcom's TRX50 SMS Text Messaging Alert System greatly enhances public safety communications by seamlessly integrating mobile devices with your TRX50 radio fire alarm receiver by delivering critical alert messages directly and instantly to any number of cellular phones or devices via SMS text messaging.

Key Features:

Reliable Communication: Ensures immediate dissemination of alarm messages for public safety dispatching, crucial to municipal and military fire departments. **Powered by the Twilio™ API:** Harness the robust Twilio API for flawless message delivery. Requires an active Twilio subscription. **Cyber Safe:** Outbound-only messaging to eliminate any cybersecurity risks to the head-end receiver. **Manual & Automated Alerts:** In addition to receiving system-generated, priority-one alerts, users can receive manually input messages from the console for detailed instructions and optimal response.

Why Choose Sigcom's TRX50 SMS Text Alert System?

Secure, real-time communication is critical in emergency situations. Sigcom's TRX50 Alert System ensures that your team is always informed and ready to act, minimizing response times and maximizing safety.

Upgrade your public safety dispatching with Sigcom's TRX50 Alert System—because in emergency response, every second counts.
